Subject: Puget Sound Nutrient Dialogue materials posted to web

Greetings Puget Sound DO listserv subscribers,

We have posted updates to the project webpage
(http://www.ecy.wa.gov/puget_sound/reducing-nutrients.html) with information from the Puget Sound Nutrient Dialogue including:
presentation slide
decks, speaker information, a summary report of the day's discussions, and a link to
our Flickr album
with great pictures from the event. We video recorded the presentations and are
processing that video
for Ecology's YouTube channel. That takes some time and we will post links to the
videos the webpage
when they are ready.

Thank you to all of you who were able to come to the Dialogue back in July, and for
those of you who
were unable to make it I encourage you to check out the material and let me know if
you have
questions. And I want to thank the speakers and the facilitator for providing great
information, my

RE Puget Sound Nutrient Dialogue materials posted to web.txt
colleagues that helped pull it together, and the Green River College for such a
great meeting space! The
post-event survey results looked great and your responses help me understand the
kind of information
that you all want next.

This project is moving steadily forward. We anticipate publishing a new blog every
month on Ecology's
ECOconnect blog throughout the rest of 2017. We are calling it the Puget Sound
Nutrient Watch. Each
month we will talk about different ways that nutrient over-enrichment is impacting
Puget Sound and
how we are using the Salish Sea Model too understand how much we are affecting the
nutrient
problem. We will highlight new publications, studies, and web resources that talk
about Puget Sound's
nutrient issues.

You can read about it here:
<http://ecologywa.blogspot.com/search/label/Puget%20Sound%20nutrients>

Or just type "ECOconnect Puget Sound Nutrients" into your internet browser search
engine.

I hope you are all able to get out and enjoy the last few weeks of August at your
favorite places around
Puget Sound, and find your reasons to love it!
